

“Porcelain Jungle Post it” nr. 6 is abt. The following subjects...

Grout Haze, stains, porosity on porcelain and their solutions?

...as you can imagine...a lot of info to squeeze in one page, so
It had to be somewhat “general” to put across as many useful information
As possible and hopefully be able to retain it.

I just want to make one important clarification before I leave you with the slide and its
content, i.e.:

**TOO MANY CLEANING CREWS, MAIDS, HOMEOWNERS WHILE CLEANING THE FLOOR,
USE ONE BUCKET...WITH COLD WATER, CLEANING PRODUCTS THAT LEAVE FILMS,
UNAPPROPRIATE TOOLS
RESULTING IN SPREADING DIRT AROUND RATHER THAN REVOMING IT.**

**TWO BUCKETS, ONE WITH NEUTRAL DETERGENT AND WARM/HOT WATER AND ONE WITH
CLEAN WARM/HOT
WATER TO STRAIN DIRTY MOP WATER ARE NEEDED. A SYNTHETIC CLOTH, A LONG HANDED
BRUSH
ARE THE VERY BASICS FOR A PROPER REGULAR MAINTENANCE OF ANY FLOOR.**

NEEDLESS TO SAY...WHEN THE WATER OF A BUCKET IS DIRTY...OUGHT TO BE CHANGED.

If you have any question, request, feel free to get in touch.
